# EinScan HX2

Hybrid Blue Laser & LED Light Source  
Handheld 3D Scanner

# EinScan HX2

The EinScan HX2 enhances its predecessor's features, now boosting 13 crossed blue laser lines for more detailed scanning and an increased frame rate of 120 FPS for faster scanning. Retaining the hybrid laser and blue LED technology, the EinScan HX2 excels in accuracy, versatility, and ease of use. The EinScan HX2 is ideal for automotive aftermarket, mold manufacturing, research & education, art & culture.

# Hybrid Blue Laser & LED Light

The EinScan HX2 continues the innovative integration of hybrid blue laser and LED light technology, enhancing material adaptability for a broader range of applications. The advanced blue laser captures complete data from black and reflective surfaces with exceptional surface and environmental adaptability, now with 13 laser lines for more fast and detailed scans. The efficient LED light scanning requires no markers, enabling rapid 3D scanning without preparation.

## High Efficiency

The EinScan HX2's laser scan mode reaches 1,600,000 points/s and 120 FPS, enabling rapid scans for reverse engineering, CAD/CAM, and 3D printing. It scans most objects in minutes, ensuring superior efficiency and productivity in all your 3D scanning projects.

SHINING 3D

## High Accuracy & Detail

The EinScan HX2 meets the rigorous demands of industrial applications for reverse engineering and precise measurement.

*Minimum point distance of **0.05 mm***

*Accuracy up to **0.04 mm** under laser mode*

Ring Flange  
Outer Ring Radius 52 mm  
Inner Ring Radius 26 mm

## Portable & Easy Operation

The EinScan HX2 excels in portability and ease of use with its ergonomic design and lightweight build at just 745g. Perfect for both beginners and professionals, its plug-and-play functionality and user-friendly software make 3D scanning efficient and comfortable, anywhere you go.

# EXModel

EXModel is a powerful bridge that simplifies CAD modeling from 3D scanning to manufacturing. With the integration of EXScan HX, you can now seamlessly import data to EXModel with a single click after completing a scan. EXModel offers a comprehensive set of tools that enable you to create professional-grade CAD digital models that are compatible with your CAD software.
